

Variphy Call Analytics Platform Support

Variphy is the leading provider of call analytics and reporting for unified communications platforms.

Key Benefits:

✓ **Unlimited Data Retention.**

Keep your calling data for as long as you want with no restrictions. Stay in compliance with regulatory and auditing requirements.

✓ **Centralized Platform Support.**

Maintain visibility into your call data across multiple platforms within the same analytics and reporting application.

✓ **Advanced Search Criteria and Filtering.**

Search and filter your call data based on multiple criteria, such as calling and called number, name, device, call queue, and hunt group.

✓ **Risk-Free Proof of Concept.**

Test our application in your environment with your data. Our free trial is fully licensed with no limits on features or devices.

✓ **Role-Based User Access.**

Define roles for users beyond "administrators vs. non-administrators" for better control over data visibility.

✓ **Automated Report Delivery.**

Schedule report delivery via email, email link, report repository, or chat in multiple file formats (PDF, HTML, CSV, XLSX).

✓ **Fully Customizable Reports.**

Customize your report to meet organizational needs. We offer display options for data, time period, output type, title, icon, colors, and more.

✓ **Variphy Deployment Options.**

Install application in your data center or Variphy Cloud. The choice is yours!
