# Variphy DID Provisioning for Microsoft Teams Phone

Empower your IT and telecom teams with seamless Direct Inward Dial (DID) provisioning directly within Variphy. This integrated interface simplifies number assignment, emergency location mapping, and audit tracking, all from one centralized location.

Key Features:

- **Assign DIDs to Microsoft Teams Users:** Allocate numbers to individuals or groups with ease.
- **Link Emergency Locations:** Connect or create emergency locations during provisioning.
- **View Usage and Type Details:** Gain context into each number's purpose and classification.
- **Add Provisioning Notes:** Record actions to support audit trails and internal visibility.

- **Unassign or Reassign DIDs:** Manage number changes as user needs evolve.
- **Track Provisioning History:** Review detailed logs of all provisioning activities.
- **Export Provisioning Logs:** Generate CSV or PDF reports for audits or offline access.
- **Streamline Provisioning Workflow:** Move from inventory viewing to real-time provisioning in one integrated interface.
